How does advanced visual technology reshape our perception of space?

Royal College of Art
Postgraduate Art & Design

What Will the Future World Develop Into?

Energy

Sustainable development

Circular economy
Green building

Visual technology

Virtual reality and augmented reality

Transportation

Unmanned driving
High-speed transportation

Renewable energy
Energy self-sufficiency

Environmental protection

Strict environmental protection policies
Biodiversity protection

Biotechnology

Gene editing
Bionics

Artificial intelligence

Smart assistant
Automation

Education

Environmental education
Skills transfer

Energy

Clean energy
uclear fusion

Social life

Simple lifestyle
Community autonomy

Agriculture

Organic agriculture

Strategy-1

Symbiosis

Benefits:

Holistic Integration

Sustainability

Enhanced Well-being

Innovative Solutions

Educational Value

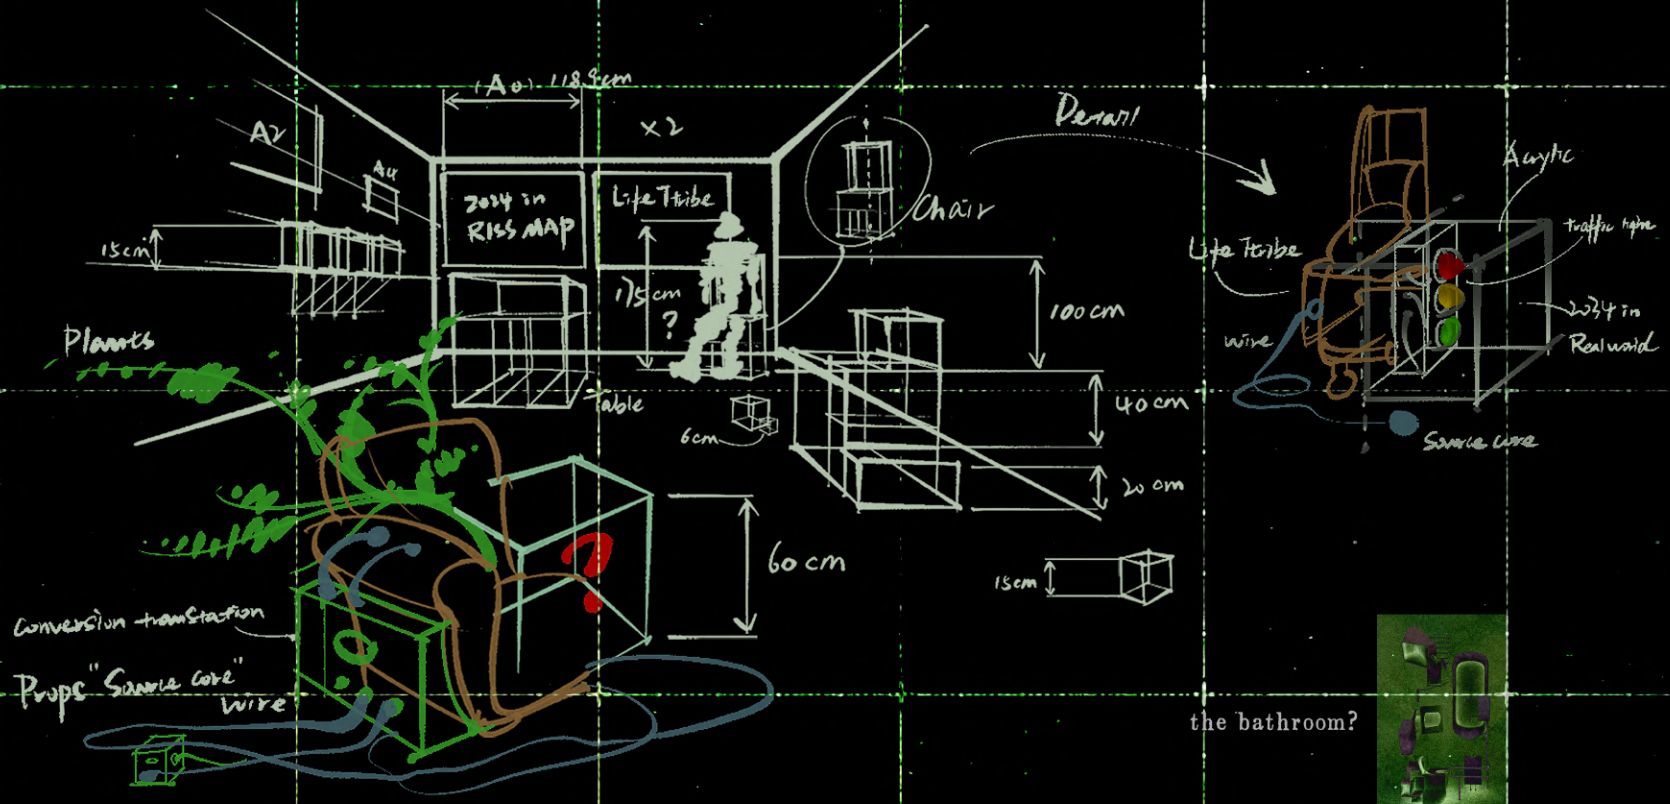

Drawbacks:

Resource Competition

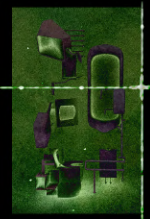

Mutual Interference

Increased Complexity

2053
Parallel Universe ZYPHERA

the bathroom?

Royal College of Art

Strategy-2

Free Development

The Bathroom

Benefits:

Natural Evolution

Innovation and Creativity

Reduced Human Intervention

Flexibility and Adaptability

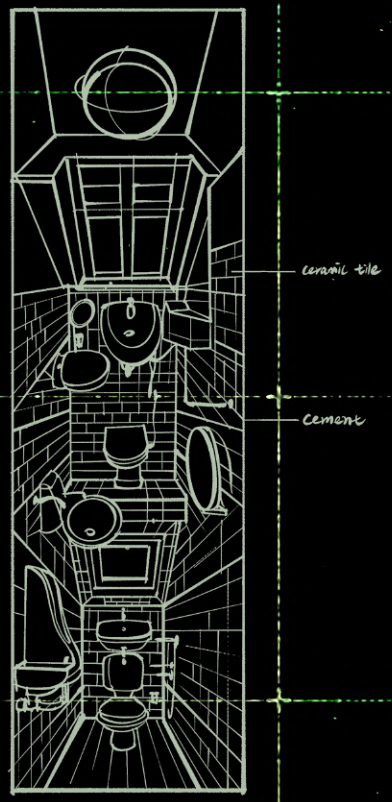

Drawbacks:

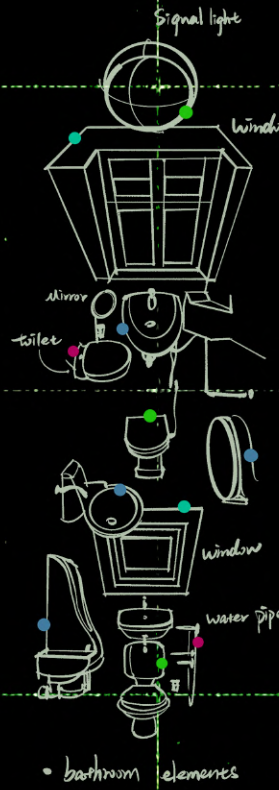

Uncontrollable Environment

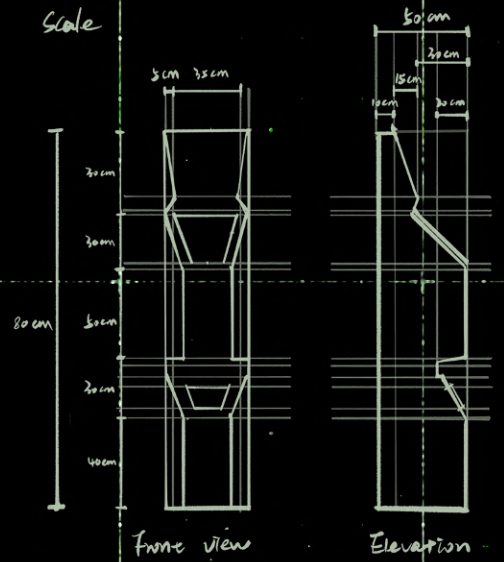

Functional Conflicts

Maintenance Difficulties

2053
Parallel Universe ZYPHERA

Strategy-3

Collaboration

The Bathroom

Benefits:

Sustainability

Balanced Coexistence

Resilience

Improved Quality of Life

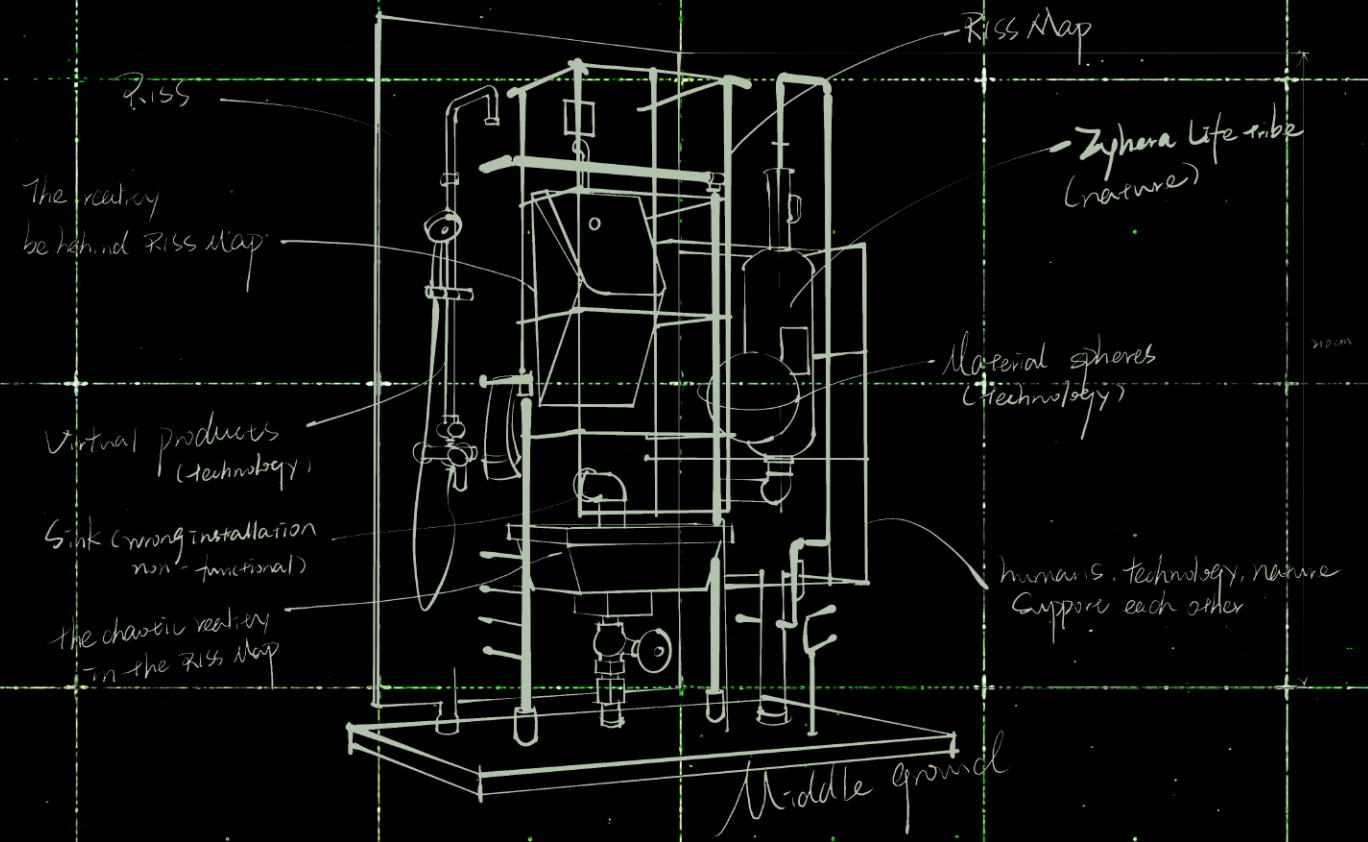

Drawbacks:

Complex Coordination

High Initial Investment

Potential for Imbalance
