LUNGNESS

'A woman in pink bikini is staring at her shiny diamond wedding ring, floating on swimming pool enjoying sunshine. She can smell the taste of sun feel the heat from dry hot desert wind. It is her favourite weather just because she was born in a desert city and this remind her of her childhood time. Her husband does not want to go back to that poor country with her so she never thought she can still experience this environment. She rubbed her eyes, trying to wake herself up. Looking back at the cottage they bought. Meanwhile her tired husband behind yawned and holding a blinder he just bought at local sleeping store, trying to close the curtains and prepare to sleep. It is 11PM and he has not sleep for more than 20 hours. Travel in honeymoon is always been sweet but not for him at that moment. He grew up in this gloomy country, he likes sunshine but not this much.'

A detailed mechanical model of a railway track system, possibly a model railway or a mechanical computer. The model features a long, straight track on the left that curves into a series of concentric, semi-circular tracks on the right. Various mechanical components, including gears, levers, and small structures, are integrated into the track system. A prominent white rectangular box with a black border is centered over the track, containing the text "Science is religion of modernity". The background is a plain, light gray.
